

Coordinates demo exemplifying remote distance travel. This technical report is scientific data but is based on an esoteric belief about localized location disciplinary having altered properties when graphing the same object with different meanings in one equation set. It's not covering the concepts of heaven and hell which I truly believe in because the mathematics of those planes are of special properties and this report won't go on a 'hike through consciousness' due to the spiritual disciplinary being the ultimate claim on said topics.

(Teleportation) to other dimensions and other worldly realms. While proving applications in devices 'the mind and the matter' and 'the null energy generator; zero point energy generator'.

Polarities endlessly running through the astral and ethereal planes, all dark matter and white matter in both planes lead to the same two places due to dimensional properties with both planes being boundless but relativity of time being included the properties of the two main event horizons shape the physiology of all behavior of anomaly type matter. Devices States in said technical report will not be included for conversation on mathematical interpretation on general meta-knowledge magic, nothing will be talked about outside in device states interpretation.

Freemason interpretation of special state operations in mathematics are a decent guide but only for what the order is an occult society for black project engineers, it doesn't allow for creative applications in 'altered advance state devices' which is what it's called in the advanced engineering fields consciousness disciplinary in the astral and aethereal planes including other worldly realms. I being an independent inventor with two famous inventions reached to many worlds, proven state for 'Null energy generator; Zero point energy Generator' is that it can't be teleported when it's on and only needs an object with a strong transition state to power it. 'The mind and the matter' is actually a device that can continuously be teleported without causing damage via inertia force and actually has application features for teleportation and time travel when slight displacement theory along with short mathematical order made on a piece of paper and ran through the device every so often when a civilization receives my conveniently small inventions aliens that have animal physiologies block time travel and teleportation for a few years duration depending on the other worlds plane's relativity of time. The coordinates for teleportation and communication in the safe anomaly matter polarity zones of the astral and ethereal planes beings can reach are $- , -, 1^{-1/2} * t^* -$ or $+$ charges with t being time and numbers shaping direction in this one equation set sends you to locations previously described and agreed statement devices claiming coordinates. In the Astral and Aetheeral planes there are landscapes and objects and through graphing disciplinary methods onto mathematical equation sets proving reality of set standard physicality instead of going to undetermined proximity which in grace with just be a 'undefined motion' in said planes. I being an occult science fiction horror film maker and a data artist found out that bounded motion and commitment states in approach to theories result in thought grace when equations give and keep proof I using mind for electrical charges. With my current esoteric belief study formatting this technical report others can help show and Interpretation on other worldly planes one reference I'd like to give in the astral plane is a library that has a bounded force allowing for fast astral projection travel and immediate teleportation bounded properties being a rest state in astral direction properties causing only mind to have greater physicality over previous states.

I being a member of The Order of The Illuminates Of Thanateores and a heavy practitioner of latin american witchcraft have done this open source technical report with a esoteric disciplinary belief that continues for a duration of a year stating that ancient other worldly plane beliefs still have physicality in certain controlled environmental state fields unbounded in it's structure and forming immediate physicality,.

Dream Log:

The Past and Only a Written Future;

Years aren't heavier currency between worlds. Time travel is illegal in the astral and ethereal plane which includes astral projecting above time, this means it will always be this way. I found the rest of the remaining ancient worlds and you rank up by dreaming.

The Trials and meeting the new high court with free purposes;

I tried doing telepathy with my psionic pack in a dream and I ended up turning into an animal and ran so I can start and finish the task. These experiences went non-stop in one dream with time not being able to be determined due to animals forms.
